

IN THE SPECIFICATION:

On page 4, please amend the paragraph beginning at line 17 as follows:

--The lighting modules ~~[[30]]~~ 20 are designed to be sealed units to prevent the ingress of water or noxious gases that may cause failure of the circuitry. Thus, if the mains electricity fails, the lighting modules ~~[[30]]~~ 20 will continue to function. This is important in an emergency situation, such as a fire, where it is important to direct people to the nearest exit or safety point.--
